Opening Statement 2027, a New Year's Party

DATE
Friday, 8 January 2027

TIME
6:30 PM onwards

VENUE
To be confirmed

GROUNDS
With good company.
And that is TP's guarantee.

THE INVITATION
invitationtp2027.netlify.app

Your links

01	The invitation ONE LINK FOR EVERYONE	https://invitationtp2027.netlify.app/ Guests state their name first, then their invitation opens. Their name is recorded so you can see who opened it.
02	Personal links ONE PER GUEST	https://invitationtp2027.netlify.app/?to=Mathew%20Lee Opens straight away with “Hi Mathew, you’re invited to” and fills in their name on the reply slip. Make all of them on the guest list page.
03	Guest list page FOR YOU ONLY	https://invitationtp2027.netlify.app/links.html Make personal links, send them by WhatsApp, text or email, tick guests off, and see who has opened and replied.
04	Replies sheet GOOGLE ACCOUNT NIAMHYK23@GMAIL.COM	https://docs.google.com/spreadsheets/d/1XE3WV_MDUW1rqiw28rV-vH2glVvQS-vdMutb8Y1oGoY/edit “Opening Statement 2027 · RSVPs”. Every reply and every open is added here by itself.
05	Website hosting NETLIFY	https://app.netlify.com/ site: invitationtp2027 To update the site, upload the new zip on the **Deploys** tab of this site. The link stays the same.
06	Design file FIGMA	figma.com/design/31TotgS10AzV42yPyyYdcz … node-id=128-41 The original invitation. Select the frame, then Export at 4x PNG (or PDF for a printer).

Before you send

- ☐ **Upload the latest website zip** on Netlify’s Deploys tab for invitationtp2027 (not on Netlify Drop, which makes a new site).
- ☐ **Set the sheet’s time zone:** in the sheet, File → Settings → Time zone → (GMT+08:00) Kuala Lumpur → Save.
- ☐ **Open the guest list page once on each of your own phones and computers.** After that, your own testing on those devices is not counted as a guest opening their invitation.
- ☐ **Send one test reply** and check it appears in the RSVPs tab. Then delete the test rows in both tabs.
- ☐ **Optional:** add an RSVP-by date, or the venue once it is confirmed (ask Claude, then upload the new zip).

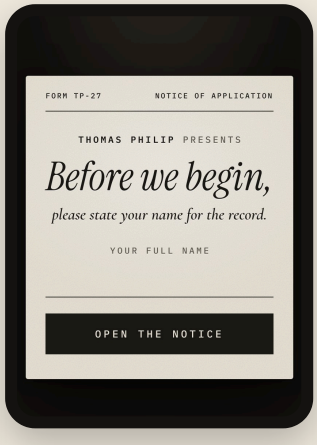

What guests see

The invitation comes in slowly, “Opening Statement” letter by letter, then the red PARTY APPROVED chop comes down as they scroll to it. Below it is a reply slip they tear off and file; their signature writes itself.

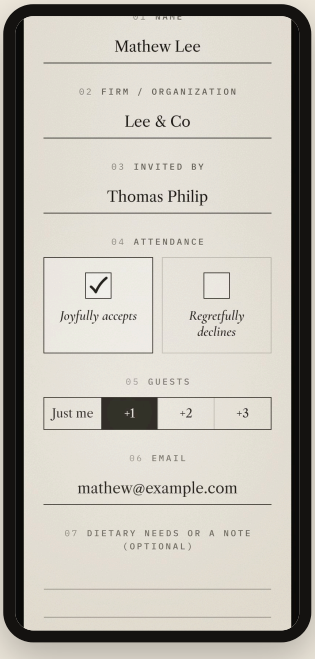

1 · PERSONAL LINK

Their first name at the top, then the invitation.

2 · SHARED LINK

“Please state your name for the record” before it opens.

3 · REPLY SLIP

Firm, who invited them, coming or not, guests, email, dietary needs. Their name becomes a signature.

4 · FILED

“Reply received” and an ORDER IN TERMS chop. If they can’t come: NOTED.

· WHAT THEY GET AFTER FILING

Coming: “Motion granted, Mathew. You and your plus one are on the record. See you on Friday, 8 January, from 6:30 PM.”

Not coming: “Noted for the record, Mathew. You will be missed.”

If something is missing, the slip asks for it (name, firm or organization, who invited them, yes or no, email) and does not send until it is complete.

· WHEN YOU SHARE THE LINK

This picture shows in WhatsApp and iMessage when the invitation link is sent, with the title “You’re invited · Opening Statement 2027”.

Sending to 150 guests

Pick one way, or mix them: personal links for close guests, the shared link for a group chat.

FASTEST · ONE MESSAGE

One link in a group or broadcast list

Post `invitationtp2027.netlify.app` once. Everyone states their name on the way in, so the greeting is personal and you can still see who opened it.

WhatsApp broadcast lists only reach people who have your number saved. A WhatsApp group shows everyone's number to everyone.

MOST PERSONAL · ABOUT 15 TO 20 MINUTES

Personal links by WhatsApp, text or email

1. Open the guest list page and paste your guests, one per line. Add a mobile number or email after a comma if you have it, or paste straight from a spreadsheet.
2. Check the country for numbers starting with 0 (set to Australia, +61; change it if needed), then press **Create links**.
3. For each guest, tap **WhatsApp**, **Text** or **Email**. The message opens already written; you only press send. Each guest is ticked off as you go.

ONE CLICK · NEEDS EMAIL ADDRESSES

Email, sent for you

Give Claude the guests' names and email addresses. Claude drafts one email for you to approve, then sends every guest their own personal link from your email.

· THE MESSAGE GUESTS RECEIVE

> *Hi Mathew, you're invited to Opening Statement 2027, Thomas Philip's New Year's Party on Friday, 8 January from 6:30 PM.*
>
> *Your invitation and RSVP: https://invitationtp2027.netlify.app/?to=Mathew%20Lee*

Change the wording on the guest list page under "Edit the message". {first} becomes their first name and {link} their personal link.

Who opened and who is coming

01 THE GOOGLE SHEET

Fills in by itself. The **RSVPs** tab has one row per reply:

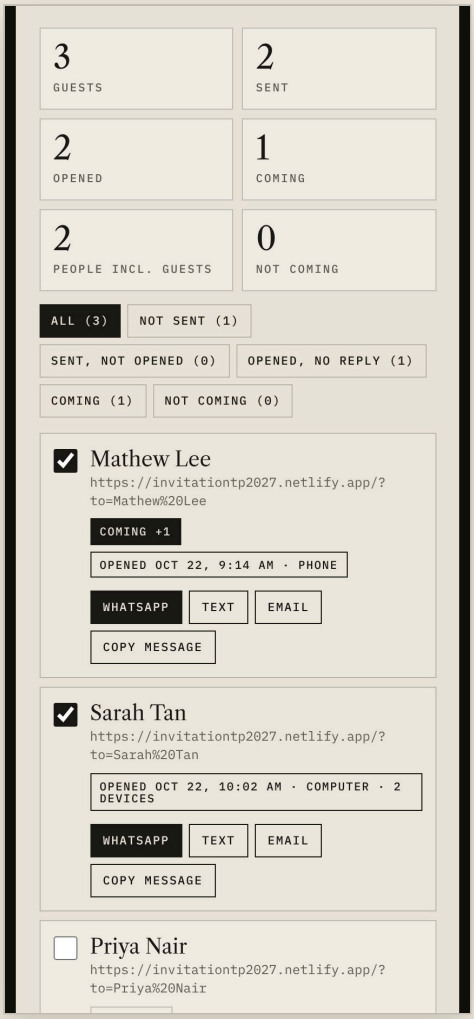

`Received` `Name` `Firm / Organization` `Invited by` `Coming` `Guests` `Email` `Dietary needs or note` `Invite link`

The **Opens** tab has one row each time a guest first opens their invitation:

`Opened` `Guest` `Device` `Link type`

02 EVERYONE AT A GLANCE

In the sheet, open each tab and choose File → Download → Comma-separated values (.csv). Drop both files onto the guest list page. Every guest then shows **Not sent**, **Sent, not opened**, **Opened**, **Coming +1** or **Not coming**, with totals and filters, so you can see who still needs a nudge.

03 GOOD TO KNOW

- An open is recorded once per guest on each device they use.
- The WhatsApp link preview does not count as an open.
- Guests on the shared link appear under the name they typed.
- Your guest list (names, numbers, ticks) stays on your own device.

· CHANGING THINGS LATER

- Venue confirmed, a new time or new wording: ask Claude, then upload the new zip on the Deploys tab. The link stays the same and everyone sees the update.
- If you ever edit the sheet's Apps Script, use Deploy → Manage deployments → Edit → New version, so its web address does not change.

· YOUR FILES

- Final designs: Black & Gold, Party Approved, Navy & Gold (PNG)
- High-res invitation, 4320 × 5400: JPG to share, PNG to print
- Website: Party-Approved-Invitation-website.zip
- Sheet script: apps-script-COPY-THIS.txt

· IF SOMETHING LOOKS OFF

- **Replies are not appearing in the sheet:** in Apps Script, check the deployment is a Web app with access set to "Anyone", then send a test reply. Ask Claude if it still does not appear.
- **The sheet will not open:** sign in as niamhyk23@gmail.com, or find it at drive.google.com under Recent.
- **WhatsApp shows an old preview:** WhatsApp keeps previews for a while. New chats show the current card.
- **Testing counts as an open:** open the guest list page once on that device first.
